FOR IMMEDIATE RELEASE

Brown Computer Solutions, of Bennington, Burglarized

The local Apple Premier partner suffered a smashed window and missing inventory late Monday night.

Local Apple Premier partner, Brown Computer Solutions, was broken into and burglarized just before 9pm on Monday night. Little is currently known about the individual responsible for the burglary, but surveillance footage reveals a white, medium built male.

Patrick Brown, owner of Brown Computer Solutions, describes the event as a “smash and grab.” He says they got away with an Apple Watch and an iPod, and “broke the biggest window we have” to get in.

Police and Brown, who lives in Brattleboro, were notified of the break-in by the alarm company just before 9pm. A K-9 unit arrived on scene shortly after, with Brown arriving later.

Brown Computer Solutions, founded in 1998, has 3 locations: Brattleboro, Bennington, and Keene, NH. They have been open in Bennington since 2013 and offer Apple certified repairs of all Apple products and sales of all Apple products except iPhone.

If you have any information regarding this burglary you are urged to contact the Bennington Police Department as soon as possible.
